

This exercise augments class discussion of mock demos and prioritized tasks (a.k.a. onion diagrams).

1. List the members of your group below. Underline your name.
2. Critique the mock demos and task presentations. Include identifying information, title, main ideas, strengths, and weaknesses for each.

For the *onions of tasks*, indicate whether the tasks have the appropriate granularity, and whether the number and nature of tasks in each layer is suitable. Justify your answers briefly.

[additional space for answering the earlier question]
