

This exercise augments classroom discussion code packaging and presentation.

1. List the members of your group below. Underline your name.
2. Based on earlier discussions, devise a scheme to evaluate code packaging on a scale of 0 to 10. List the main components and how they are scored.

3. Evaluate each code package presented using the scheme of Question 2. Include identifying information, and component-wise scores. Add brief comments to clarify scores.
