Today: Sections of the report: Introduction, Methods. Textbook Chs. 10, 11.
Next class: Sections of the report: Results, Discussion. Textbook Chs. 12, 13.
Reminders: Project report submission 1 due soon. Work with your advisors.

1. List the members of your group below. Underline your name.

2. Consider the Introduction of a report on a Capstone project that studies sorting implementations on handheld platforms. (Ask for details as needed.) Outline, in itemized format, the main points that section should make, mapping them to the funnel structure described in the textbook. Your outline should be detailed enough to permit anyone familiar with the work to quickly generate the complete text.

3. Critique of Question 2 by:

4. For each of the textbook's guidelines on materials and methods, identified by the numbering on page 256, (1) indicate whether it is applicable as-is to CS capstone reports and (2) if it isn't, provide a reworded guideline that is closest to it in spirit.

5. Identify, by number, the three guidelines from Question 4 that are the most signifant for CS capstone reports. For each of these, (1) provide a brief, illustrative example of text that does not follow the guideline, (2) briefly describe the problems that text creates for a reader, and (3) rewrite the text to fix the problem.

6. Identify all instances of faulty parallelism on pages 256–257 of the textbook. Provide rewritten text that fixes the problems.
