**Today:** Presentation starts and ends, continued. Code packaging. **Next class:** 

- 1. List the members of your group below. Underline your name.
- 2. Considering packaged code, list ten items that should be covered by a good README file. Also list five items that are better covered elsewhere (indicate where).

- 3. For each presentation:
  - (a) Note the presenter and title.
  - (b) List the five most significant points made in the beginning portion.
  - (c) Repeat Question 3b for the ending portion.
  - (d) Of the desired contents of presentation beginnings (from the previous class), indicate those that were adequately addressed and those that were not.
  - (e) Repeat Question 3d for presentation endings.
  - (f) Provide three concrete suggestions for improvement.

[additional space for answering the earlier question]
