COS 350 Spring 2017 Class Exercise 5 2017-02-07

Today: Divide and Conquer; §§ 4.1,2.
Next class: Homework 2 due. Solving recurrences; $\S \S 4.3,4,5$.
Reminders: Read material before and after class. Use the class newsgroup.

1. List the members of your group below. Underline your name.
2. Trace the execution of the Find-Max-Crossing-Subarray algorithm on the array A depicted below, with the arguments low, mid, and high equal to 1,5 , and 10 , respectively.

i: |  | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| A[i]: | 88 | 19 | 9 | -66 | -2 | 116 | -56 | -12 | 87 | 101 |

List the values of sum and left-sum after each iteration of the first for-loop of the algorithm. Similarly, list the values of sum and right-sum after each iteration of the second for-loop.
3. Depict the recursion tree that outlines the recursive calls made by the Find-MaximumSUbARRAY algorithm when invoked on the array of Question 2 (repeated below), with low and high equal to 1 and 10 , respectively. The nodes of the tree should be labeled with the function invoked (Find-Maximum-Subarray or Find-Max-CrossingSUbARRAY and the edges should connect each function's node to the node of its invoker.

A[i]:

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 88 | 19 | 9 | -66 | -2 | 116 | -56 | -12 | 87 | 101 |
