- 1. (1 pt.)
 - This quick check is closed book, notes, etc.
 - Use the **classroom and textbook conventions** and terminology.

Read the above carefully; then write your name below:

2.	(6 p	6 pts.) In a red-black tree: [fill in the blanks as precisely as possible]		
	(a)	every	contains the same number	
		of black nodes.		
	(b)	consecutive	nodes are disallowed.	
	(c)	newly inserted nodes are initially colored	·	

3. (3 pts.) Why is it that the textbook's implementation of red-black trees does not include checks for Java null links when traversing the tree? [The correct answer can be stated in one short sentence.]
