

**Today:** Presentation starts and ends, continued. Code packaging example.

**Next class:** Packaged code walk-throughs. Place your packaged code at an easily accessed network location before class.

1. List the members of your group below. Underline your name.
  
2. Refer to the *boxfs2* code package.<sup>1</sup>
  - (a) List a few ( 5) key pieces of information that the README file covers well.
  
  - (b) Repeat the above for information missing from the file.
  
  - (c) List three concrete suggestions for improving the README.
  
  - (d) What aspects of the package make it easy for the intended recipient to comprehend and use?
  
  - (e) Repeat the above for aspects that pose difficulties.
  
  - (f) List three concrete suggestions for improving the packaging.
